

Instructions for the proper use of the Arborvitae for Kids

Dear Customer

The immune system is the body's defense against infectious organisms and other invaders. Through a series of steps called the immune response, the immune system attacks organisms and substances that invade body systems and cause disease.

The immune system is made up of a network of cells, tissues, and organs that work together to protect the body. In most cases, the immune system does a great job of keeping children healthy and preventing infections.

Arborvitae for Kids is suitable for infants and children over the age of 12 months and supports the health and function of the immune system.

Due to the powerful nature of the ingredients and the way they are combined, Arborvitae enters the bloodstream and goes to work in many ways.

Arborvitae for Kids contains Pycnogenol®, a Maritime Pine Bark extract supported by scientific evidence.

Directions for the use of Arborvitae are as follows:

Age	Daily Dosage	How often
Over 12 years (over 40kg)	40mL	20mL twice per day
8-12 years (25kg to 40kg)	30mL	15mL twice per day
4-8 years (17kg to 25 kg)	20mL	10mL twice per day
2-4 years (13kg to 17kg)	15mL	7½mL twice per day
1-2 years (10kg to 13 kg)	10mL	5mL twice per day

Place your Arborvitae bottles in the fridge after opening and shake well before use on each occasion.

If symptoms persist consult your healthcare practitioner.

We welcome feedback regarding your Arborvitae experience as well as any other benefits you have noticed. We also welcome your comments on our website (www.arborvitae.com.au) and our Facebook page (**Arborvitae Health and Wellbeing**).
