

Instructions for the proper use of the Arborvitae Teenagers Immune Boost and Concentration Supplement

Dear Customer

A normal cognitive function is a prerequisite for a healthy life and impacts your memory, behavior, thinking and ability to perform everyday activities.

The immune system is the body's defense against infectious organisms and other invaders. Through a series of steps called the immune response, the immune system attacks organisms and substances that invade body systems and cause disease. In most cases, the immune system does a great job of keeping teenagers healthy and preventing infections.

The Arborvitae Teenagers Immune Boost and Concentration Supplement contains a potent combination of natural substances and is designed to assist the body to neutralise many of the negative health effects of today's lifestyle.

Arborvitae assists the body and mind to rid itself of waste and toxins. Due to the powerful nature of the ingredients and the way they are combined, Arborvitae enters the bloodstream and goes to work in many ways.

Arborvitae:

- Has anti-inflammatory actions
- Helps the cognitive function in healthy teenagers, students and young adults
- Has potent antioxidant and anti-inflammatory actions and immune building effects
- Has excellent radical scavenger properties and supports the health and function of the immune system
- Contains Pycnogenol®, the Maritime Pine Bark extract supported by scientific evidence

The best way to take Arborvitae is as follows:

- Young adult dose: take 60 mL everyday – 30 mL each morning and evening.

Place your Arborvitae bottles in the fridge after opening and shake well before use on each occasion.

If symptoms persist consult your healthcare practitioner.
